

Getting Started in SlideShare

April 15, 2009 – Chris Clark, Kaneb Center

Learning goals: after this workshop participants will be able to

1. Upload a presentation to SlideShare
2. Share a presentation with other people

Workshop outline

1. Create a SlideShare account – <http://www.slideshare.net/>
1. Browse available slideshows
2. Create a simple PowerPoint
3. Upload the file to SlideShare
4. Enter details – privacy, license, etc.
5. View the slideshow
6. Optional – embed it into a Concourse page

What can you do with SlideShare?

1. Post your own presentations on the web
 - Share them with no one, everyone, a limited group
 - Synch audio to your slides
 - Insert a YouTube video
 - Designate a Creative Commons license
 - Receive comments from other people
2. Find presentations created by other people
3. Use presentations in different contexts: class, conference, website
4. View a presentation in various ways
 - On its SlideShare web page
 - As a downloaded original file (if the author allows)
 - Embedded in a web page: Concourse, blog, wiki, website
 - In a presentation pack - www.slideshare.net/widgets/presentation-pack

Technical

Formats you can use

- PowerPoint (ppt, pptx, etc.)
- OpenOffice, Keynote
- Acrobat PDF

SlideShare does NOT support

- Files larger than 100 MB
- Animation or line-by-line builds
- Transitions
- Embedded audio or video
